Abhinav Dinesh Srivatsa

BENG101

Final Assessment Test 3

<div align="center">Video Resume Script</div>

Hello, I am Abhinav Dinesh Srivatsa, a graduate from Vellore Institute of Technology, Vellore. I majored in computer science with a specialization in data science. I did most of my schooling at Isha Home School and rigorously maintained a ninety five percent average throughout the tenth and twelfth grades, and a 9.3 CGPA in college.

My internship experience consists of 3 internships I have done over the years 2019 to 2024. In 2019, I interned at MakeMyTrip for six months where I learned to manage workflows and contributed to the automated suggestion bot. In 2023, I interned at IBM where I understood and contributed to help build the first commercially available quantum computer. My third and latest internship was at Spotify, where I implemented a feature to analyze and suggest similar music to users using machine learning algorithms.

As someone with a true passion for data science and machine learning, and with lots of experience in the field, I would be excited to join your company and create products that help other people. I guarantee that you will not regret hiring me. Thank you for taking time out of your day to listen to this video resume.
